Platelet Rich Plasma (PRP) can be used to aid in the treatment of many ailments as seen in the illustration.

How does it work?

Platelet Rich Plasma is a trending topic in human sports orthopedic medicine. Used for sports injuries as many wear and tear issues. Platelet Rich Plasma Kit, or PRP, is a breakthrough product for pets utilizing blood plasma with concentrated platelets that once activated accelerate the healing properties of the isolated growth factors at a fraction of the cost of traditional human treatments.

Platelets that are found in whole blood contain many healing growth factors and bioactive proteins. These bioactive proteins can initiate tissue healing, and assist with inflammation. The treatment offers an affordable all natural alternative to drugs and steroids.

How does it benefit your pet?

The PRP can be introduced topically in or around an injured joint, tendon, or used in its gel form to treat large burns or wounds. The PRP is not limited to acute injuries, it can also be used for chronic conditions.

- Complimentary to your Pet's next surgery
- Osteoarthritis
- Tenosynovitis
- Wound Care
- General Inflammation
- Post Surgical Healing
