### **16 WEEKS OLD**

- Physical Exam
- Weight Check
- Canine Distemper Vaccine Booster # 3 (Due again in 1 year)
- Lyme Vaccine Booster # 2 (next lyme vaccine due in 1 year)
- Sentinel Tablet
- Rabies Vaccine (next due between 9-12 months)
- Flea/Tick Prevention (based on weight)

\*Your puppy will need a weight check every month until fully grown so that the Sentinel tablet is the proper dose according to your dog's weight. Flea/Tick prevention is also based on weight and when your puppy reaches its adult weight there will be different preventatives available.

\*The kennel cough (Bordetella Vaccine) should be given if your dog will be boarded, attend training classes, or will be going to the groomer. This can be given any time. Feel free to discuss it with your veterinarian.

\*Spay/Neuter should be done between 5-7 months old. Please schedule the surgery at your earliest convenience.

- Home Again Microchip at spay/neuter surgery (if your dog is lost or stolen he/she can be identified and return to you)
- 4DX Test (blood test that looks for heartworm disease and tick borne diseases such as Lyme Disease. (next test is due in 1 year)
